KEY FEATURES

- EOS is EPA Registered for Public Health Claims.
- EOS actively and continuously kills >99.9% of harmful bacteria* within two hours of exposure, even after recontamination.
- EOS Preventive | Biocidal Surfaces™ continually reduce the bioburden in the patient environment by self-sanitizing at least 12 times per day, between routine, punctate daily cleaning by Environmental Services.
- The proprietary copper-oxide technology is infused throughout the material, ensuring that any exposed surface is actively killing bacteria.
- Cleaning agents typically used for traditional touch surfaces are permissible for cleaning EOS so healthcare facilities are able to maintain the product in accordance with their regular infection control guidelines and practices.
- EOS is a renewable surface and can easily be refinished.

PUBLIC HEALTH CLAIMS

Laboratory testing has shown that when cleaned regularly:

- This surface continuously reduces bacterial* contamination achieving a 99.9% reduction within two hours of exposure.
- This surface kills greater than 99.9% of Gram negative and Gram positive bacteria* within two hours of exposure.
- This surface kills greater than 99.9% of bacteria* within two hours and continues to kill 99% of bacteria* even after repeated contamination.
- This surface helps inhibit the buildup and growth of bacteria* within two hours of exposure between routine cleaning and sanitizing steps.

* Testing demonstrates effective antibacterial activity against Staphylococcus aureus (ATCC 6538), Enterobacter aerogenes (ATCC 13048), Methicillin resistant Staphylococcus aureus (MRSA-ATCC 33592), Escherichia coli 0157:H7 (ATCC 35150) and Pseudomonas aeruginosa (ATCC 15442).

**MAINTENANCE & CLEANING**

Healthcare facilities must maintain EOS in accordance with infection control guidelines and users must continue to follow all current infection control practices, including those practices related to disinfection of environmental surfaces.

In order for the EOS Preventive | Biocidal Surfaces to maintain efficacy, the product must be cleaned and maintained according to the directions included on this label. Cleaning agents typically used for traditional touching surfaces are permissible; the appropriate cleaning agent depends on the type of soiling and the measure of sanitization required.

Normal tarnishing or wear of EOS will not impair the biocidal effectiveness of the product. Commercial warranty: 1 year. See warranty documents for explanation of coverage under warranty.

This product must not be waxed, painted, lacquered, varnished, or otherwise coated.
